

Nitto Chemical

coumarone resin G90

Grade of Coumarone Resin:

Nitto Chemical produces three types of coumarone resin, i.e. G-Type, N-Type and V-Type resin. The G-Type is used mainly for rubber, the N-Type for adhesives and V-Type for paint, varnish and various type of ink. The N-Type is a resin specially developed for pressure sensitive adhesives such as SIS hotmelt type.

The V-Type is a resin specially developed for its high degree of compatibility with various substances, such as natural resin, synthetic resin, oil and solvent.

properties	grades
	G-90
Appearance	Bead
Softening point(°C)	80~100
Color number (Gardner)	16 or less
Compatibility	-
Acid Number (KOH mg/gr)	0.18
Transparency	Clear
Ash content	Trace
Specific gravity	1.11
Bromine Number (gr/100gr)	13
Molecular weight	625
Solvent	Toluene & Xylol
